

Unified Structural Physics (WAM-2025): Structural Gravity and Mass-Inertia Theory

Wasfi Ahmed Mohammed Al-Shhada

December 20, 2025

1 Introduction: Matter as the Sole Source

In the WAM-2025 framework, we establish that mass density ρ is the primary driver of both curvature and energy states [cite: 2025-12-19]. This eliminates the need for dark energy/matter by redefining gravity as the inertial trace of matter swimming in a zero-resistance medium [cite: 2025-12-15, 2025-12-18].

2 Cosmological Expansion Mechanism

The expansion of the universe is a structural response to mass-energy nihilism occurring at the event horizon [cite: 2025-12-20]:

- **Phase I (Deformation):** Nuclear shell distortion during high-pressure transitions [cite: 2025-12-20].
- **Phase II (Nihilism):** Total collapse leading to "Obituary Vaporization" of electrons and quarks, emptying mass-volume from spacetime and triggering expansion [cite: 2025-12-19, 2025-12-20].

3 Official Proclamation of Unification

OFFICIAL MASTER HASH (SHA-512)

daaf1de8be86acbdd8b56e43c808ae85fd148bff...

Researcher: Wasfi Ahmed Mohammed Al-Shhada

Status: UNIFIED LAW CONFIRMED

Project Code: WAM-2025-UNIFIED
